

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-121\CP1.

~~GE~~ foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

Genetically engineered foods are NOT
Natural. Over time, we will find out
they are carcinogenic. We should be giving
farmers incentives to make natural foods.
